## Tose Sanaat Akhavan engineering company

With more than 15 years of activity and efforts in the field of consulting and designing high technology water treatment processes, construction and implementation of water treatment and disinfection systems, Akhavan Industry Development Engineering Company is proud to introduce its services as follows:

### •Design, Manufacture, Installation, Commissioning and Operation

All types of water treatment and purification systems and industrial water desalination devices by reverse osmosis (Ro) method

### •Supply of desalination equipment and parts

Such as: pressur vessels, high-pressure pumps and cartridge filters, chemical materials

### •Restoration and renovation of all types of depreciated water treatment system

### • Providing consulting services in the field of design, repairs and maintenance of water treatment systems

**Akhavan industry development** engineering company produces all kinds of water purification & treatment systems on a domestic, semi-industrial, and industrial scale with a capacity of 200 liters to 2 million liters per day as well as spare parts of water treatment systems such as filters and chemical material and consumables for water purifiers such as filters and chemicals.

This group has been the supplier of the largest chain of upstream and specialized industries, especially power plants and oil companies in the country. In addition to meeting domestic needs, this company has the honor of exporting to 14 countries.

### **Our clients:**
